

Specxus Liquid H10

73 x 20 mm

The Specxus Liquid H10 from RICHRFID is a synthetic paper RFID label specifically engineered for liquid-filled containers. Its optimized design ensures stable reading performance on challenging substrates such as glass bottles for drinking water, wine, and other liquid products, making it highly suitable for retail and beverage applications.

The product complies with EPCglobal Class 1 Gen 2, ISO 9001 quality management, and ISO 14001 environmental management standards, ensuring reliable, industry-grade performance for diverse use cases.

Equipped with the Alien Higgs 10 IC, it has excellent read/write sensitivity along with enhanced backscatter capability and is optimized for high-volume applications. This RFID IC provides a flexible EPC memory structure supporting 96-bit EPC formats, plus a 32-bit expansion for longer EPC formats. It also supports up to 32 bits for optional user memory data, which enables the flexibility to store additional data beyond the EPC level such as encryption keys, additional asset information, and serial numbers.
