

# Flmeta Fit

## 60 x 25 mm U9xe(Tamper proof)

Due to the fact that both metal and liquid are highly conductive materials that reflect or absorb UHF radio waves, they can detune nearby antennas or even completely block the signal. As a result, standard RFID labels generally perform poorly on metal surfaces or liquid-filled containers.

By means of specialised antenna design and materials, RICHRFID Flmeta anti-metal&liquid labels could operate splendidly and reliably on metal surface and liquid-filled containers, also perform competently on non-metal and non-liquid items, though not at peak performance.

Tamper proof RFID label is a type of radio-frequency identification tag designed to prevent unauthorized access or tampering. Unlike standard RFID labels, which can be easily removed or tampered with, tamper-proof RFID labels are built with additional security features to ensure that once attached, they cannot be removed or tampered with without rendering the tag unusable. Benefits of using tamper-proof RFID labels include such as enhanced security, asset protection, improved traceability, compliance, and cost savings.

Their slim profile and availability in roll form ensure seamless compatibility with RFID printers, enabling simultaneous printing and encoding.

The self-adhesive backing and inherent flexibility further enhance their versatility, allowing for reliable application on both flat and curved surfaces. Typical use cases include asset tracking for IT equipment, electronic devices, cosmetics, beverages (both alcoholic and soft drinks), industrial components, pharmaceuticals, and ESD containers, among others.

### Highlights & Benefits

- ✓ **Tamper proof:** Cannot be removed or tampered with without rendering the tag unusable
- ✓ **Superior performance on diverse surfaces:** Optimized for metal, liquid-filled containers, plastic, and more.
- ✓ **Ready for RFID printing:** Fully printable and programmable with standard RFID encoders/printers.
- ✓ **Flexible and conformable:** Self-adhesive, thin, and flexible design ensures reliable adhesion on curved surfaces.
- ✓ **Durable construction:** Features a waterproof PET face material for enhanced longevity.
- ✓ **Fully customizable:** Supports bespoke design, on-demand printing, and encoding services.

### Applications

- ✓ Facility & equipment
- ✓ Fixed asset
- ✓ Electronics
- ✓ Liquid container
- ✓ Metal parts

## Technical Features

Model	RCO7067
<b>RFID Features</b>	
Air Interface Protocol	EPC Class 1 Gen 2 / ISO 18000-63 Type C
Frequency	860-960 MHz
Chip Type	NXP Ucode 9xe
Memory	User - N/A; EPC - 128 bits; TID - 96 bits
Data Storage	> 10 years
Re-write	100,000 times
Read Range(2W ERP)	FCC: > 3.8 m(12.5 ft), on metal ETSI: > 3.8 m(12.5 ft), on metal
<b>Physical Features</b>	
Dimension	60 x 25 x 1.25 mm / 2.36 x 0.98 x 0.05 in
Face Material	White PET
Operating Temperature	-40°C to 85°C / -40°F to 185°F
Survival Temperature	-40°C to 120°C / -40°F to 248°F
Storage Condition	20±5°C, 50±10% RH, protect from sunshine
IP Rate	IP68, test for 5 hours at 1m deep water
<b>Other Features</b>	
Installation	Adhesive on clean & dry surface
Customization	Printing, Encoding, Designing, etc.
Support Printer	SATO CL4NX, Zebra ZT410 RFID Silverline and ZT411 On Metal, TSC Printronix T6000e, etc
Recommended Ribbon	Resin-based
Package	500 pcs / roll, 4 roll / box

### Radiation Pattern

PS: The performance is theoretical values in the lab and the actual effect depends on the specific applications.
